

This is the item linked within a single article:

The screenshot shows the Joomla! menu configuration interface. At the top, there is a search bar with 'Jobs' entered and a search icon. Below the search bar, there is a table with columns for 'Status' and 'Title'. The table contains one entry: 'Jobs (Alias: jobs)' with a status of 'Published' (indicated by a green checkmark) and a link to 'Articles » Single Article'. Below the table, there are buttons for 'Save', 'Save & Close', 'Save & New', 'Save as Copy', and 'Close'. The 'Menu Title' field is set to 'Jobs' and the 'Alias' field is set to 'jobs'. Below these fields, there are tabs for 'Details', 'Options', 'Link Type', 'Page Display', 'Metadata', 'Parameters (JA Extended)', and 'Module Assignment'. The 'Details' tab is selected. Under 'Menu Item Type', 'Single Article' is selected. Under 'Select Article', 'Jobs' is selected. The 'Link' field is circled in red and contains the URL 'index.php?option=com_content&view=article&id=41'. The 'Target Window' is set to 'Parent' and the 'Template Style' is set to '- Use Default -'.

*The menu is not actually a part of the main menu from Joomla that we use at the top in the mega menu.

We use this menu to just provide links to individual articles. (In the past I had asked how to make this happen and this was what I was told to do.) It works fine, except for the link it is providing which is difficult to give people.
